

Do you want to:

- improve your classroom climate and improve student self-efficacy?
- make your STEM classroom more inclusive to students of diverse backgrounds and preparation?
- learn from the literature and experts in the field of inclusive teaching?

Join us!

An NSF Funded, Free, EdX Course

- **Online, asynchronous course offered March 6 - April 28**
- Curated and taught by national experts in inclusive teaching and pedagogy
- Requires approximately 3 hours per week for up to 6 weeks

Our Local Learning Community

- **Offered in Morgantown and on zoom weekly from March 6 - April 17**
- Facilitated by WVU community members
- Brings WV current and future faculty together to discuss local challenges and common solutions

What you'll do:

- Complete the asynchronous course and meet weekly with other WVU educators
- Examine issues of diversity, equity and inclusion in STEM teaching
- Reflect on your own, and your students', identities and experiences
- Question your assumptions about all aspects of instruction
- Identify and implement learner-centered structures and strategies
- Apply principles of evidence-based inclusive teaching
- Use student data and feedback to inform pedagogical and curricular choices
